

I don't have before pics. But I have a now pic. And I can't say enough good things about my cellerciser. It's amazing. I've never really liked exercising until now. So I thank you!!

Trust me when I say, I was never really what I thought overweight. But according to medical weight advice, I was.

5'2" and I was 138 lb. now I'm 122lb. All since April of this year. Using only the cellerciser. And I have changed my diet a bit. But nothing drastic. I've never eaten poorly anyway. But now, with changes being made, I eat more fruit and vegetables for sure. And I always drink 1/2 my weight or more in oz of water a day.

Just wanted to share with you a bit of what I'm doing, and my progress.

As you say, we're family now. I'm more than pleased with my purchase of my cellerciser!!

And wanted to say again, thank you so much!!
