Dear Dave,

I am 83 years old. Approximately, 1 1/2 years ago I had 2 heart valves replaced and a pacemaker installed, which left me walking and moving very slow and my brain seemed "fuzzy"

approximately, 4 months ago, I purchased a "Cellerciser" and have been using it daily.

The results were incredible!! I have regained my balance and flexibility and my brain "fuzzy" seems to have disappeared. I feel like a new person.

Dove, thank you so much for your innovated  
spirit and your dedication in helping others  
have a new life.

Your grateful friend,

Ruth
